Live Polling and Q&A with Slido in Webex

Create interactive, inclusive and insightful meeting experiences

Have you experienced a meeting that felt like a one-way street? The main speakers are droning on and you have no practical way of interacting with others aside from the chat? Unsurprisingly, this ends up being a majority of meeting experiences. Not with Webex.

In Webex, meetings become a two-way street using live polling and Q&A with Slido. Slido includes a diverse set of polling options and Q&A features that create the most interactive, inclusive and insightful meeting experiences.

Live Q&A

Collect
Participants can send in questions live during the meeting.

Moderate
Review incoming questions and filter to address the most relevant.

Categorize
Organize questions by categorizing them with labels.

Democratize
Let participants upvote other's questions.

Respond
Answer questions yourself or allow everyone to respond.

Live polling

Word clouds
Display answers in a cloud formation and see what's most popular.

Multiple choice
Capture everyone's responses quickly with predefined options.

Open text
Allow everyone to type in custom answers or comments.

Ranking polls
Let everyone rank options based on their preferences.

Quizzes
Test everyone's knowledge live with a timer and leaderboard.

Rating polls
Let everyone rate anything—meetings, topics, decisions, etc.

Create meaningful engagement, foster an inclusive culture, and build stronger connections.

Benefits

Interact with paricipants at scale, confirm participants' understanding, and streamline decision making.
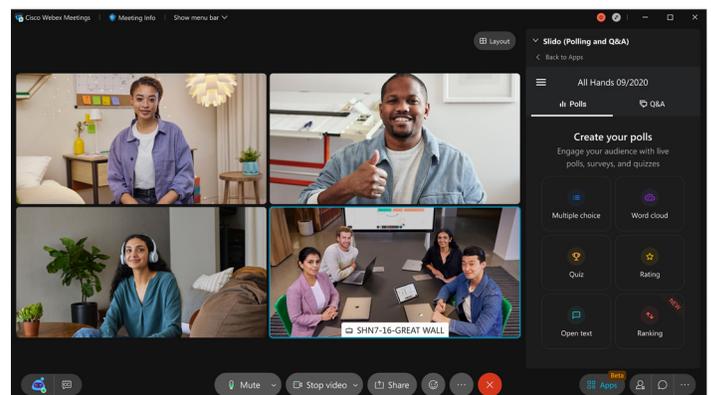

- Interact with participants, whether in the office or remote, before, during and after meetings

- Confirm participants' understanding of the meeting topics and address any areas of uncertainty

- Streamline decision making by crowdsourcing ideas from everyone and ensuring quick alignment

Democratize discussion, empower everyone, and listen to improve.

- Democratize discussions by allowing participants to view and upvote each other's questions

- Empower everyone by creating a safe space for them to ask and answer questions anonymously

- Listen to improve decision-making by collecting feedback from everyone, not just the most vocal participants

Facilitate team bonding, create transparency, and build trust.

- Facilitate team bonding by allowing everyone to get to know their colleagues and coworkers better

- Create transparency across the whole company by enabling anyone to ask and answer questions

- Build trust between leaders and employees by allowing them to ask any questions and address the most critical ones
