Faster collaboration with Webex on ChromeOS

Webex PWA on Chromebooks

Easily collaborate in real-time from anywhere on your Chromebook through Webex Progressive Web App (PWA) built specifically for ChromeOS. Offering integrated meetings, calling and messaging, users can join a unified and installable app-like experience on a Chromebook.

Webex PWA can be accessed on ChromeOS devices through a web browser, installed then pinned to the shelf for easy access, making it simple and intuitive for users to message and meet with others.

Meetings & Calling

Create engaging meeting and calling experiences to bring everyone together regardless of location, language, or time zone.

Messaging

Get secure messaging organized by workstreams where everyone can contribute anytime. Make collaboration engaging.

Boost your collaboration
and productivity with Webex

- Be heard during meetings–even in the noisiest environments–with the advanced noise removal

- Share individual windows, applications, or your entire computer screen in real-time

- Instantly translate your meeting into your chosen langauge to enhance live collaboration

- Automatically take notes and action items with the Webex Assistant so you can stay focused on your conversations

- Record meetings so everyone can quickly catch up on what they missed

- Message securely with features like file sharing, co-create with whiteboarding, personalize spaces, add emojis reactions and much more
