

# Webex Calling for Google Chrome

## Deliver an enterprise-grade cloud calling experience within Google

Webex Calling offers an enterprise grade calling experience on the trusted platform used by over 45 million cloud calling users worldwide. Delivered through a global infrastructure of 16 data centers with service in over 120 countries around the world, Webex Calling provides unparalleled reliability and geographic coverage.

Google Chrome users can now access the Webex Calling experience directly from the Chrome browser, without the need for a separate desktop application. Available as an extension in the Chrome Web Store, Webex Calling for Chrome delivers a powerful suite of enterprise calling features through an intuitive, browser-based softphone.

Webex Calling for Chrome complements the secure, powerful, and flexible Chrome experience that's available on a broad range of devices, including the innovative portfolio of Google Chromebooks.

### Seamless

Instantly access enterprise calling features from the Webex Calling for Chrome extension.

### Productivity enhancing

Improve productivity by eliminating the need to switch between different applications.

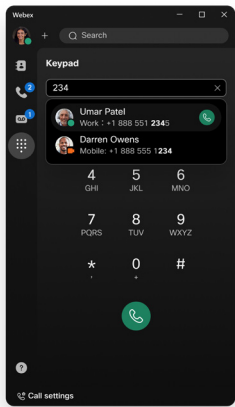

### Powerful

Leverage the proven enterprise grade platform used by over 45 million people worldwide.

# A powerful enterprise calling experience

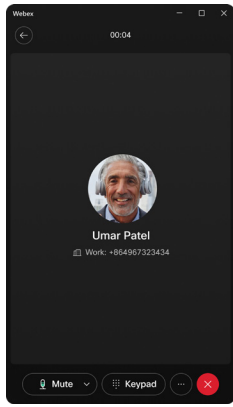

From the convenience of your Chrome browser.

The floating Webex Calling for Chrome softphone provides immediate access to enterprise calling features. It delivers the performance of a desktop application, through the simplicity of a Chrome browser extension.

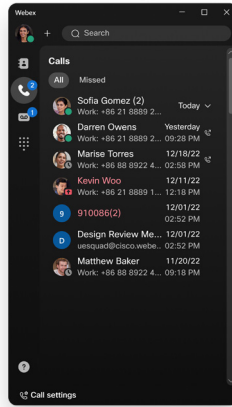

Softphone dialer

Dial by number, name, or extension, or click to dial from any webpage.

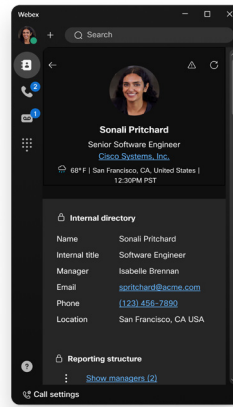

Live call window

Access to mid-call features like mute, transfer, and hold.

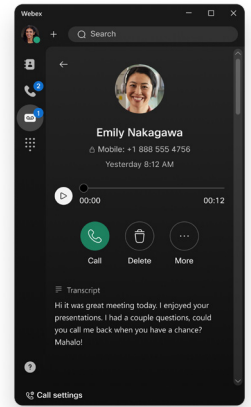

Call history

Check and easily return missed calls.

Contacts

Search the enterprise directory and see the presence of contacts.

Voicemail

Listen to voicemail and read message transcripts.

Notes:  
Some features displayed will follow general availability.  
Available for Webex Calling only, does not support Cisco BroadWorks or Unified Communications Manager.
