Webex Assistant

Meetings and Devices

Webex Assistant is a digital assistant for the enterprise.

AI-powered and voice-activated Webex Assistant automates common collaboration tasks so you can focus on being more efficient at work.

Devices

Webex Assistant for Devices offers you a hands-free way to control your collaboration experience. Create a safe return to the office by controlling Webex Devices with voice commands. With a simple "okay Webex," you can:

Start and end meetings

Call from the directory

Join a personal room

Book a room

Check room availability

Extend a meeting

Operate device controls

Learn more commands

Compatible Devices

Webex Assistant for Devices works with Cisco Webex Boards, Webex Desk Pro, and Webex Room Series.

Enable Webex Assistant for Devices

Meetings and Events

With Webex Assistant for Meetings and Events, you can follow up on action items, take note of important decisions and highlight key moments.

When Webex Assistant is turned on, the host and participants can capture important items with one click or a voice command.
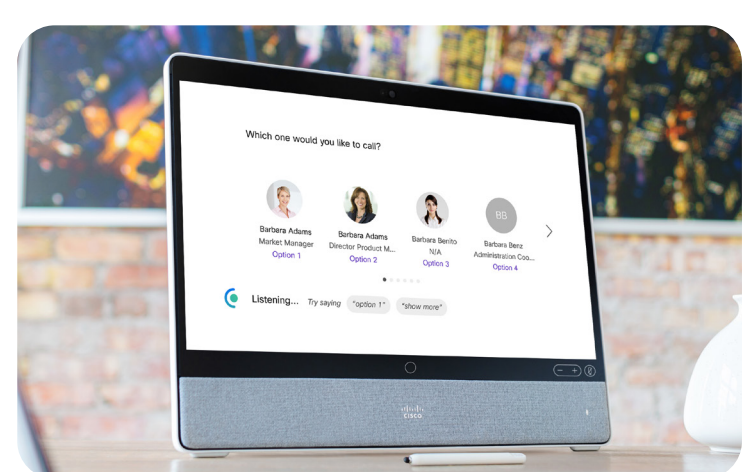

Use Webex Assistant in a Webex Meeting or Event

Webex Assistant Skills

Webex Assistant skills offers the ability to customize your Webex Assistant for Devices for your organization's needs. You can create voice-driven applications that relay command information and visuals back to Cisco Webex Room Kit, Cisco Webex Board, and Cisco Webex Desk Pro to save time and make meeting management easy.
